

This directory contains the current distribution of MCMT - version 2.8

In details, it should consist of

- (i) a directory for Linux 32 bit compilation;
- (ii) a directory for Linux 64 bit compilation;
- (iii) a directory **examples** containing some safety problems, divided into seven subdirectories (each problem specification file may contain a brief explanation of the problem, some bibliographical reference, acknowledgements to the authors of the MCMT formalization, and references to papers or websites related to MCMT project);
- (v) a tutorial and a user manual.

For usage information and for major novelties with respect to previous releases, please consult the User Manual. An essential online help is also available through **-h** option.

MCMT project was originated by joint work of S. Ghilardi and S. Ranise. Since version 2.0, the tool is maintained by

Silvio Ghilardi - Univ. degli Studi di Milano - Silvio.Ghilardi@unimi.it
